Part B for March 1927

SUBJECT

Reorganization of the Geological Department.

To

The Director of Geology
" Registrar, Mysore University
" Comptroller, Mysore Govt, thro' Financial Sec
" Other Heads of Depts.

Gen. 2217-67/C.S. dt 5/4-7

Sanctions certain arrangements for the coordination of work of the Geological Deptt. with that of the Geological Section of the Mysore University with effect from the date of relief of Mr. Jayaram.

Note on the Re-organization of the Geological Department submitted according to personal instructions of Dewan.

. . .

The Geological Department now consists of one Director on Rs.1000-50-1200, two Assistant Geologists on Rs.250-25/2-450 respectively and one Sub Assistant Geologist on Rs.125-25/2-250 and one Assistant Chemist on Rs.70-10-150 besides the ministerial establishment. For teaching Geology in the University there is now one Professor in the grade 500-50/1-1000(Mr. Sampathiengar the Professor of Geology has reached the maximum) and one Lecturer in Geology on Rs.150. This post has recently been converted into that of an Assistant Professor on Rs.175. In addition to these officers there is another supernumerary officer, viz., Mr. Sen on Rs.600 who does not however come at present within the sanctioned cadre.

The Special Finance Committee recommended that having regard to the present reduced operations of the Department, it was not necessary to have a whole-time officer to run the department and that it would be conducive both to economy and better co-ordination of work if the post of Professor of Geology in the Mysore University was combined with that of the Director of Geology. With such a combination special attention can be devoted to making the instruction in the University have a bearing on local conditions and problems while the staff can be utilized to deal with a large variety of problems. Owing to the long vacation of the University which coincides with a part

of the field season, the Director will have sufficient time to attend personally to some field work during the season. While, as he will be responsible for the general direction of the course of studies in the University even at other times he ought to be able to find sufficient time for inspection.

The proposals of the Finance Committee were however, not accepted, the main difficulty in the way being that there were two officers of more or less co-ordinate rank who could not be fitted into any such scheme viz., Mr. B. Jayaram, Director of the Department and Mr. Sampathiengar, Professor of Geology. As Mr. Jayaram is due to retire on the 23rd April 1927 the time seems to be opportune for carrying out the combination as it is likely to result in much saving of cost without in any way affecting the activities of the Department.

On the retirement of Mr. Jayaram the department may be reorganized as follows:--

The Director of Geology will also discharge the duties of Professor of Geology in the Mysore University and in this dual capacity he will control both the work of the department and professorial work of the University. His pay may be fixed at Rs.1000 with a duty allowance of Rs.200 for discharging the duties of Professor of Geology.

The Department consists of one supernumerary officer on Rs.600, viz., Mr. Sen. He may be appointed Deputy Director on Rs.600. It is desirable that all the officers of the Department

if otherwise competent should by turns be connected with the teaching of the College so that they may not only keep themselves up-to-date in their technical knowledge but the University staff will also have an opportunity of being in touch with practical work. When the Deputy Director does teaching work he may be given a lecturing allowance of Rs.75/- per mensem.

The number of Assistant Geologists may be continued at 2 as at present. If a proper stimulus is given to the activities of the department there will be sufficient work for these two officers. If this number is found to be too large it may be reduced later on.

There is however another officer called Sub Assistant Geologist in the Department on Rs.125-25/2-250. There is a lecturer in the University also who now draws Rs.150 but his pay has been proposed to be raised so as to correspond with that of an Assistant Professor. He may also be put into this grade Rs.125-25/2-250 and given a suitable start.

If any officer who is engaged in departmental work is employed simultaneously in University work he may be given a duty allowance which may be fixed at Rs.50/- per mensem in the case of officers of the grade of Asst. Geologist and Rs.35 for Sub Asst. Geologist.

These suggestions will result in the saving of at least Rs.1000 as it means the abolition of one post on Rs.1000.

The above note if approved will be circulated to the Members of Council and the subject brought up for consideration at a meeting of Council.

C.B. File No. of 192

Serial No.

There is not sufficient work for a full time Director of Geology and accordingly, the arrangement of combining the duties of the Director of the Department and the Professor of Geology in the University may be tried for a period of three years. The Ex-officio Director may be given a Duty Allowance of Rs 200 as proposed.

When one person holds both these offices, it is necessary to give him a Deputy for attending to the routine business of the Department under his instructions and the proposal, therefore, to appoint Mr. Sen as Deputy Director may also be approved.

I am not sure if it is necessary or desirable to require every member of the Department to do the tuition work in the Central College by turns. The existing arrangement of having, for tuition work, one Professor and one Assistant Professor on Rs 175 may, I think, continue.

The services of the Sub-Assistant Geologist Mr. B. Rama Rao may be utilised in connection with the mining of the Byrapur Block directly by Government agency.

With the readjustment of ~~the~~ staff as above, the Department of Geology would have, besides the Ex-Officio Director, three whole-time officers, viz., 1 Deputy and 2 Assistants. What should be the programme of work to be undertaken by the Department hereafter and how it should be distributed

NOTE—Contn. Sheet

I have already written to the V.C. who was quite in favour of the proposal & suggested it was now for the Council. If the matter is considered necessary or desirable to do so.

Mr
2/11

It seems to me that the University Council or at least the Vice Chancellor should be consulted confidentially, if it has not already been done, e.g. the feasibility of Combining the two posts. I am also of the opinion that this is done in some of the foreign universities although not, I believe, Germany & the Anglo-Saxon countries

A draft order is submitted for approval. It is not clear from the proceedings of the University Council whether an additional post of Professor is required in addition to the one already sanctioned. If the Dy Director & other Officers of the Dept can take part in teaching work the additional appointment does not seem to be necessary. If necessary this may be sanctioned when detailed proposals regarding distribution of work are received.

Hon'ble Member

Sir,

When an additional Asstt Prof is given I am not sure if the Dy Dir need be entrusted with any part of the teaching work.

The Assistants are touring officers and it is I think, not convenient to require them to "deliver regular and short term special Courses of lectures"

When the new Dir - Mr. Sampath Iyengar - that will have to submit the future programme of work of the Dept

(may be considered at time of next meeting of Council perhaps when dealing with Sanskrit Members) 8/15/1

matter)

NOTE—Contn. Sheet

Submitted to His Highness.

In view of the facts that there was no proper co-ordination between the work of the Geological Department and the teaching of Geology in the University, and that the officers of the Department and the University were not employed in a manner calculated to yield the best results from their combined activities, I gave certain instructions to the Chief Secretary to prepare a note on the co-ordination of the work of the Department and the University by amalgamation of the post of the Director of Geology and that of the Professor of Geology in one and the same officer after the retirement of the present Director of Geology, Mr. B. Jayaram in April 1927. D.

2. These proposals were considered in Council and the University Council was then consulted in regard to the proposed amalgamation. The University Council after appointing a Committee to go into the subject have also approved of the amalgamation and have made certain suggestions in regard to additional staff and the apportionment of the cost. They want an additional Assistant Professor, but I am not satisfied as to the necessity for this. C.

3. A Draft Order on the lines agreed to by the University Council with the above modification was circulated to the Members of Council who have also agreed to it. The Draft Order may be graciously approved. B.

4. The new arrangements are likely to result in substantial savings while tending to raise the standard of work in the Department on the whole. A.

D.O.

Dear Mr. D'Souza,

Personally I am strongly of opinion that the Geology Department and the University could be linked up in the way proposed to the advantage of both, and of the State as a whole, -- but the University Council ought to be consulted on a radical innovation like this. The University Council meets on the 17th instant, and I would request that the question may be held up pending the ascertainment of its views.

Yours sincerely,

B N Seal

To

P.G.D'Souza, Esq., B.A., B.L.,

Chief Secretary to the Government of

His Highness the Maharaja of Mysore,

Bangalore.

Sir,

With reference to your D.O.letter No.1782/C.B. dated the 6th instant, re the question of linking up the Geological Department and the University by appointing Mr.P.Sampat Iyengar, as Director of Geology in addition to his own duties as Professor of Geology, I am directed to state that the enclosed report of the Sub-Committee to whom the question was referred was considered at the University Council Meeting held on the 21st instant and it was resolved that the Proceedings be approved with the following modifications:-

(i) that one additional Asst.Professor be appointed, ✓

(ii) that the Assistants of the Geological Department should deliver regular and short special courses of lectures in connection with the teaching work;

(iii) that a definite minimum of work, viz., between a third and a fourth of his present work should be done by the Professor;

(iv) that the College time-tables and programme of the Department should be so arranged as to prevent interruption of teaching work; and

(v) that this arrangement be tried for two years in the 1st instance.

A copy of extract from the Proceedings of the Meeting of the University Council is enclosed.

I have the honour to be,
Sir,

HH

(7) University of Mysore.

Proceedings of the Meeting of the Council Sub-Committee, held at the Central College, Bangaloro, on Friday the 17th December 1926, at 8.30 A.M.

Present:

1. Rajatantra Pravina
   Sir Brajendranath Seal, Kt., M.A., Ph.D., D.Sc.,
   Vice-Chancellor & Chairman.
2. Dr.E.P.Metcalfe, D.Sc., F.Inst.P.,
3. Mr.B.P.Srikantia, M.A., B.L.,
   Offg:Registrar(Secretary).

Absent:

Mr.C.S.Balasundaram Iyer, B.A.,

Question of linking up the Geological Department and the University by appointing Mr.P.Sampat Iyengar, M.A., as Director of Geology in addition to his own duties as Professor of Geology.

I. RESOLVED that it is desirable that the Geological Department of the State should be linked up with the Department of Geology in the University.

2. There are two alternative ways of doing this:-

Plan (a). To combine the Professorship of Geology in the University with the post of Director of Geology.

As the Director will have touring and surveying work, this plan will involve the strengthening of the College staff. Messrs:A.M.Sen, M.Sc.,(Birmingham), M.I.M.E., F.G.S., and B.Rama Rao, M.A., from the Geological Department, may be deputed to do teaching work in the College, - it being understood that the pay of the Director-Professor will be borne on the Budget of the Geological Department, suitable allowances being paid out of the College Budget to the Director and the two assistants for their teaching work in the College.

In respect of their work in the University, the Director-Professor, and his two assistants, like any other Professors or assistant, will be subject to the control of the constituted authorities of the University.

Under the conditions proposed above, it will be possible to arrange for more extensive tours and excursions of the Geology students such as will bring them into contact with the actual surveying, prospecting and other scientific work of the Geological Department. This will enable our Mysore students so trained in the realistic problems of Geology to find opportunities of useful employment and service in other parts of India.

(b). To take over the Geological Department into the University, as in the case of the Department of Archaeology.

The Geological Department is too extensive and its administration too heavy to be attached as an appennage to the University or University College of Science.

Plan (b) does not therefore appear to us as to be feasible. We recommend Plan (a).

3. General observations:

If the Scientific work of the Geological Department in the State is to be developed, as is essential in the best interests of the State, it should be possible to associate the Scientific Departments of the University, such as those of Chemistry, Physics, Zoology, Botany, &c., with the Geological Department in those developments. The pressing problem of working the Mineralogical resources of the State for industrial purposes may be brought one stage nearer solution in connection with the contemplated developments of technology in the University, and our courses in Applied Science and Chemical and Engineering Technology might comprehend a Mineralogical and Geological Section.

Sd/- B.N.Seal,
Chairman.

Read:-

G.O.No.I.C.974-1033/Geol-19-22-1 dated 9th August 1922 issuing orders on the reorganization of the Geological Department.

2. Correspondence ending with letter No.11210 dated 27th December 1926 from the Registrar, Mysore University, submitting certain proposals in regard to --- linking up the work of the Geology Section in the Central College, Bangalore with that of the Department of Geology.

Order--No. 2217-67/C.B.152-26-1

Dated Bangalore, the 5th Feb. 1927.

The superior staff of the Geological Department now consists of a Director - on Rs.1000-50-1200, two Assistant Geologists on Rs.300-25-450 and one Sub Assistant Geologist on Rs.125-25/2-250. In addition to these, there is a supernumerary Officer (Mr. A. M. Sen) on Rs.600 who is not included in the sanctioned scale. For teaching Geology in the --- University, there are one Professor on Rs.500-50/1-1000 and one Assistant Prof. on Rs.175.

2. The question as to how best to -- coordinate the work of the Geological Department with the teaching work in the University to the mutual advantage of both has been engaging the attention of Govt.

Z. to the Capitals 6493/ dated 11/2/27.

for some time past. The Special Finance Committee had recommended the combination of the post of Professor of Geology with that of the Director, but under the --- conditions then prevailing, Govt. were not able to accept this suggestion. The University authorities are also of opinion that a linking up of the work of the two organizations is a very desirable measure, as it would on the one hand provide greater facilities for bringing the students of the University into --- closer contact with the actual surveying, prospecting and other scientific work of the Department and on the other hand enable the Department to benefit by a closer association with the scientific work of the University.

3. Govt. are therefore pleased to --- direct that the two posts of Director, Geological Deptt, and Prof. of Geology in the University be combined into one and the following arrangements brought into effect, from the date of ~~retirement~~ relief of Mr. B. Jayaram the present Director of Geology, for the future working of - the Department of Geology and the Geological Section of the University :-

(i) The Director of Geology will be ex-officio Professor of Geology in the Central College. There will be one Assistant Professor for teaching Geology as at present. The services of the Officers of the Geological Department may also be utilised whenever necessary for

teaching work or for delivery of lectures at the discretion of the Head of the Department without prejudice to the work of the Department.

(ii) The pay of the Director and ex-officio Professor of Geology will be fixed at Rs.800-50-1000, with a duty allowance of Rs.200. Mr.P.Sampath Iyengar will be appointed Director of Geology and ex-officio Professor from the date on which Mr. B. Jayaram is relieved of the charge of the Deptt.

(iii) In view of the Professorial work that the Director will have to do under the new arrangement, a Depy. Director of Geology will be appointed to assist the Director in the disposal of the routine work and in the general administration of the Department. The pay of the Depy. Director will be fixed at Rs.600-50-800 per mensem. Mr.A.M.Sen, who is now a supernumerary officer, will be appointed Depy. Director and absorbed in the regular scale of the Department.

(iv) The other staff of the Deptt. will be retained at its present sanctioned strength.

(v) In his dual capacity, the Director will control the work of the Deptt. as well as the teaching work in the University and see that the programme of the Department and the College-time-tables are so arranged as not to clash with one another

In respect of their work in the University the Director and the other Officers of the Department will be subject to the control of the constituted authorities of the University.

4. As soon as the new arrangements -- come into force the Director of Geology is requested to submit a programme of work for the Department with detailed proposals in regard to a suitable distribution of work among the various --- officers of the Department and the adjustment of the work of the Department and that of the Geological Section of the University.

5. Half the salary of the Director and the allowances if any paid to the other staff of the department for doing teaching work in the University will be debited to the budget of the University.

The financial effect of the revised arrangements is shown in the --- statement apppended.

Government Order No. I. C. 974-1033—Geol. 19-22-1, dated 9th August 1922, issuing orders on the re-organization of the Geological Department.

2. Correspondence ending with letter No. 11210, dated 27th December 1926, from the Registrar, Mysore University, submitting certain proposals in regard to linking up the work of the Geology Section in the Central College, Bangalore, with that of the department of Geology.

ORDER. NO. 2217-67—C. B. 152-26-6, DATED 5TH FEBRUARY 1927.

The superior staff of the Geological Department now consists of a Director on Rs. 1,000—50—1,200, two Assistant Geologists on Rs. 300—25—450 and one Sub-Assistant Geologist on Rs. 125—[illegible]—250. In addition to these, there is a supernumerary officer (Mr. A. M. Sen) on Rs. 600 who is not included in the sanctioned scale. For teaching Geology in the University, there are one Professor on Rs. 500—[illegible]—1,000 and one Assistant Professor on Rs. 175.

2. The question as to how best to co-ordinate the work of the Geological Department with the teaching work in the University to the mutual advantage of both has been engaging the attention of Government for some time past. The Special Finance Committee had recommended the combination of the post of Professor of Geology with that of the Director, but under the conditions then prevailing, Government were not able to accept this suggestion. The University authorities are also of opinion that a linking up of the work of the two organizations is a very desirable measure, as it would, on the one hand, provide greater facilities for bringing the students of the University into closer contact with the actual surveying, prospecting and other scientific work of the department and, on the other hand, enable the department to benefit by a closer association with the scientific work of the University.

3. Government are therefore pleased to direct that the two posts of Director, Geological Department, and Professor of Geology in the University be combined into one and the following arrangements brought into effect, from the date of relief of Mr. B. Jayaram, the present Director of Geology, for the future working of the Department of Geology and the Geological Section of the University :—

(*i*) The Director of Geology will be *Ex-Officio* Professor of Geology in the Central College. There will be one Assistant Professor for teaching Geology as at present. The services of the officers of the Geological Department may also be utilised, whenever necessary, for teaching work or for delivery of lectures at the discretion of the Head of the Department without prejudice to the work of the Department.

(*ii*) The pay of the Director and *Ex-Officio* Professor of Geology will be fixed at Rs. 800—50—1,000, with a duty allowance of Rs. 200. Mr. P. Sampath Iyengar, will be appointed Director of Geology and *Ex-Officio* Professor from the date on which Mr. B. Jayaram is relieved of the charge of the department.

(*iii*) In view of the Professorial work that the Director will have to do under the new arrangement, a Deputy Director of Geology will be appointed to assist the Director in the disposal of the routine work and in the general administration of the department. The pay of the Deputy Director will be fixed at Rs. 500—50—600 per mensem. Mr. A. M. Sen, who is now a supernumerary officer, will be appointed Deputy Director on Rs. 600 and absorbed into the regular scale of the department.

(*iv*) The other staff of the department will be retained at its present sanctioned strength.

(*v*) In his dual capacity, the Director will control the work of the department as well as the teaching work in the University and see that the programme of the department and the college time-tables are so arranged as not to clash with one another. In respect of their work in the University, the Director and the other officers of the department will be subject to the control of the constituted authorities of the University.

4. As soon as the new arrangements come into force, the Director of Geology is requested to submit a programme of work for the department with detailed proposals in regard to a suitable distribution of work among the various officers of the department and the adjustment of the work of the department and that of the Geological Section of the University.

5. Half the salary of the Director and the allowances, if any, paid to the other staff of the department for doing teaching work in the University will be debited to the budget of the University.

The financial effect of the revised arrangements is shown in the statement appended.
